

Aiden Buxton

**Project:****Acounter Counter****Interview Form**

Person Interviewed:	Interviewer:	Date:	Version ID:
Kyle	Aiden	11/12/21	0.2

**Purpose of Interview:**

To gauge the demand of our app and what features are desired and sought after.

**Summary of Interview:**

There was a suggestion that this app could help with medication memory. The callender app on many phones has a similar feature but is cluttered by other days and news not asked for. Reminders are considered very helpful. Adding features tied to nutritional health is suggested.

**Open Items:**

Consider the nutritional health suggestion.

**Additional Notes:**

This app might be used to help users take medication so its proper functionality online of offline is important.
